

QuickScreen Roller Banner

Template @50%

Create an overall finished size of 850 x 2250mm

250mm at the bottom will retract into the roller mechanism.

The background colour should be continued to the full 2250 length to avoid a white line at the base of the visible area.

The finished visible area will be 800 x 2000mm

This area will not be seen, it retracts into the roller mechanism.
If your artwork is full coverage please allow it to continue to the bottom.
