

Expand MediaFabric outdoor

Expand MediaFabric outdoor

A double-sided outdoor display that is both large and small. Large – with the extra large surface no one will miss your message. Small – when collapsed so compact that it fits into the boot of your car – even if you drive a Fiat 500.

The design is based on lightweight and strong aluminium tubes and integrated support feet, which together can handle wind up to 14 m/s.

Perfect for all kinds of outdoor events.

Expand MediaFabric outdoor comes in a sturdy bag with ball bearing wheels.
